

# User Story

- All tasks are done (as described below)
- Most use cases have no bugs
  - If there is a persistent bug: discuss with group - may fix it in a later sprint
- All branches for the tasks have been deleted on GitHub

# Task

- Code written
- No ESLint errors/warnings
  - If need to override for code to work: discuss with group
- Merge branch master to local branch
  - Fix merge conflicts
  - Retest code to confirm that it still works
- Make a Pull Request on GitHub to merge task branch to master, if no conflicts: push
- Pull master branch, double check that it works
- Tell group to update their copy of the master branch with the new changes
